

Hint of Former Glory Rail Car Preservation Project

The Revelstoke Railway Museum is seeking a skilled project manager to carry out exterior rail car preservation work on the museum site. This position is grant funded and is a short term contract for summer 2017 with flexible hours and minimal supervision. Successful completion of one targeted rail car will determine future plans for additional equipment restoration.

Should have previous experience in or knowledge of restoration of railway equipment or similar car body work. Work will involve power washing, sanding, welding, wood frame and window repair, priming, and painting.

Must be comfortable working with others and be willing to supervise volunteers as needed. Standard safety protocol and professionalism will be expected.

For more information, please contact Jennifer Dunkerson, Executive Director, Revelstoke Railway Museum, 250-837-6060 or director.railway@telus.net
